We have a problem. According to the Federal Reserve, 70% of college students graduate with student loan debt taking 21 years to pay off. Only 1.5% earn enough scholarships to cover college costs. Most parents didn't save for college, are starting too late, and have no idea what college admissions are looking for.

Hi, I'm Denise Thomas. For over 15 years I've been showing parents, just like you, how to craft their child's high school career into a branded application package that has colleges begging their kids to go to their school.

Spend 30 minutes with me in a Free Zoom session, and I'll show you how many of my client's children win multiple scholarships…. And actually get paid to go to college!

Register now…and see how getting free college can change your child's life forever! I'll leave a link in the chat box.
